

BETTER ENERGY NEEDS YOU AS PROJECT QUALITY MANAGER (M/F)

Give your best to better energy and make the commitment with Total. With over 500-plus professions in 130 countries, we offer high safety and environmental standards, strong ethical values, an innovation culture and wide-ranging career development. Be part of the global team whose mission is already shared by 100,000 employees: to make energy better each and every day.

TOTAL Raffinerie Mitteldeutschland GmbH operates one of the most modern refineries in Europe with approx. 630 employees and seeks support in the context of a project limited for 3 years from 1 January 2018 for the location in Leuna support.

Your Tasks

- Ensure that project procedures are identified, developed, implemented and applied
- Management of project activities: action tracking, risk management, Project Synthesis Review and other applicable governance and assurance reviews close out
- Develop, implement, update and follow the project Quality Assurance plan and the Quality Control plan (including inspection, testing and certification requirements)
- Review and comment on contractor quality plans, inspection and test plans, manufacturing/fabrication procedures, welding and testing procedures, and other quality documents
- Review and comment on suppliers and vendors quality plans and procedures
- Organize, plan, manage and coordinate inspection requirements
- For equipment and materials at workshops until release for shipment
- For equipment Factory or Site Acceptance Tests (FAT and SAT)
- For prefabrication, installation, construction, pre-commissioning, commissioning and testing activities at site
- Define and execute quality assurance audits
- Ensure that the quality records, acceptance certificates, mechanical completion certificates or equivalent are prepared and collated in accordance with project requirements
- Ensure delivery of final quality documentation

Your Profile

- Engineering Degree
- Detailed technical knowledge of fabrication and inspection of equipment and materials in the refining or petrochemical industry; welding controls and quality documentation
- Previous experience in Project Quality Assurance and Control management, or equivalent background experience for at least 10 years
- Familiar with European, German and local rules and regulations
- Strong analytical, organizational and communication skills
- Ability to prioritize tasks and work effectively under time pressure
- Fluent written and spoken German and English
