

Project Specialist Supply Chain & Logistics (m/f/d) - Hamburg

The scope of the role will include all disciplines related to Supply Chain and Logistics projects at Essity within the Business Unit Health and Medical Solutions, such as Sales & Operations Planning, inventory management, data analysis and project support. The position is key to the implementation of business system solutions, driving best practice in Supply Chain and Logistics, such as supply chain management, and continuous improvement in operations management of service, investment, and risk.

We're looking for people who embody our values, aren't afraid to challenge, innovate, experiment, and move at a fast pace. We're always looking for ways to improve our products and ourselves. If this is you, we'd love to talk.

What You Will Do

- Support global strategic projects or initiatives which includes project team member activities
- Develop key work streams of the business transformation program in close liaison with service departments and other stakeholders to ensure service improvement and efficiency savings
- Routing flow analysis of the HMS Medical logistics network
- Work independently on Supply Chain and Logistics activities and ensure targets of projects are achieved considering project time schedules
- Act as liaison for Global Supply Chain materials to other functions within Essity to facilitate major process or systems enhancements (e.g. inventory optimization, data analysis, customer requirements etc.)
- Support the monthly Sales & Operations Planning process by data analysis and report creation for top management stakeholders (Finance, Commercial, Operations)
- Review new and existing processes, resources and systems, making and overseeing any changes to Essity infrastructure where necessary
- Analyze root cause and put in place corrective actions
- Identify risks and contingencies and communicate progress to initiators
- Perform training and rollout globally to new systems and processes within Essity

Strategic Projects

- Inventory analysis and tracking of corrective actions
- Roll-out projects which include global best practice and global standard processes (for example S&OP, etc.)
- Special projects such as Medical Device Regulation or initiatives related to Essity integration

Who You Are

- University Degree in BA, Engineering or comparable – post graduate degree is a plus
- Minimum 3 years, 5-7 years preferred experience in operations management or supply chain and logistics management with hands on supply chain planning and projects experience in an international environment
- Medical sector experience is a plus
- First experience with Project Management (agile or similar methods), training and/or Six Sigma certification preferred
- Very good knowledge about supply chain and logistics, certifications & involvement in associations is a plus
- Strong system analysis and problem-solving skills
- Workflow design/process mapping capability
- Capability of deep diving into specific performance areas, e.g. root causes, benchmarking and specific day to day issues
- Fluent English language skills in writing and speaking, preferably one additional language for an important Essity business region (e.g. Germany)
- Expert user of Microsoft Office 365 (Excel, PowerPoint), macro or VBA programming is a plus
- Advanced SAP R3 / BW / Hana knowledge
- High sense of urgency, responsibility and high commitment
- Continuous improvement and change management mindset
- Experience with cross functional and cross-cultural environment

What We Can Offer You
